

**Mobile Solutions Team
Connectivity & Grounding Training
JATC Training Center Request Form**

Objective

The objective of this training is to have a better understanding on the theory, correct application and proper installation of Connectivity and Grounding products.

Method of Presentation

Classroom instruction utilizing the Thomas & Betts Mobile Solutions Team Unit embedded with hands-on demonstration and practice.

Description

This is a three hour, hands on, training course that will teach the JATC Installer/Technician the methods of selection and installation of compression connectors for terminating, splicing, tapping and grounding products. The class will provide a comprehensive review of these products and how they are used in field installations.

Thomas & Betts and the Mobile Solutions Team are committed to the education of local JATC Trainers and Apprentices. Currently Thomas & Betts has 4 Mobile Solutions vehicles located in NY, Chicago, Houston and Los Angeles which cover a regional area in conjunction with our sales team. The trucks are maintained by dedicated Product Application Specialist that will conduct the training. If interested in having the Thomas & Betts Mobile Solutions Units visit your JATC Training Center please complete and return the attached form to Thomas & Betts. Thomas & Betts will contact the JATC Training Director as far in advance as possible when the Mobile Solutions Unit will be available for the JATC Training Center. JATC Training Centers outside the Mobile Solutions regional coverage can also apply to be placed in a data base. If the Mobile Solutions Units participates in another event within these areas the Training Director will be contacted to make arrangements.
